يقدم مكتب الربيعة الهندسية التالية:
- المنشآت الصناعية.
- المباني.
- المرافق الكهربائية والميكانيكية.
- البنية التحتية.
- إدارة المشاريع والإشراف على التنفيذ.
- خدمات متخصصة.

Alrabiah offers the following Engineering Services:
- Industrial Facilities
- Buildings
- Electrical & Mechanical Utilities
- Infrastructures
- Project Management & Site Supervision
- Specialized Services
Introduction

Alrabiah Consulting Engineers (ARE) is a multi-disciplinary professional consulting engineering firm based in Saudi Arabia with head office in Dammam and regional offices in Riyadh, Jeddah and Yanbu. Alrabiah has coupled its local professional expertise with the experience and resources of its international associates through active technical alliance. Alrabiah with over 25 years of experience has the capability & expertise to provide an outstanding level of engineering services in Industries, Buildings, Electrical & Mechanical Utilities, Infrastructures, Project Management & Site Supervision. We provide services within the framework of ISO 9000 Quality Management System that meet the expectations of our distinguished clients, such as government organizations, semi government authorities and private sector companies.

Industrial Facilities:

ARE offers design services for Process Engineering, Piping Engineering, Instrumentation & Control Engineering, and Technical Documentation. Our services cover conceptual, FEED and detailed design for oil & gas, petrochemical, water desalination & power plants and other industries.

Major Clients:

- Saudi Aramco & AGOC
- SWCC
- Royal Commission
- Marafiq
- SABIC
- KAUST
- Ministry of Interior
- Ministry of Finance
- Ministry of Defense & Aviation
Buildings:
ARE offers comprehensive design services for commercial, educational, industrial, medical, recreational buildings & facilities. Our services include the design for architecture, structural, civil, mechanical, electrical, telecommunications, instrumentation, interior design and landscaping. The complete design package includes design drawings, bill of quantities, specifications, general conditions of contract and cost estimates.

Infrastructures:
ARE offers design services for multi-disciplinary engineering services for various infrastructures such as roads, bridges, ports and harbors, sewerage & drainage water networks, city planning, etc. We also provide Transportation Planning, Transportation Engineering, Traffic Engineering, Traffic Management, Traffic Simulation and Traffic Safety Audits for roads, highways & bridges. ARE also conducts inspection / condition assessment / rehabilitation design for concrete & steel structures.

Electrical & Mechanical Utilities:
ARE offers FEED and detailed design, specification write up, inspection of electrical & mechanical utilities. Electrical design services cover LV&MV power distribution systems, power generating plants, lighting, control and automation, cathodic protection, grounding/lightning protection, hazardous areas installations and fire alarm systems. Mechanical design services cover HVAC systems, refrigeration, hot and cold water supply systems, drainage and plumbing systems, fire protection, hydraulic analysis, gas systems, plant machinery installation and water treatment, etc.

Project Management & Site Supervision:
ARE offers project management, site supervision and third party review of large complex works that include industrial plants, infrastructure facilities & buildings, i.e. educational, commercial and medical. ARE project management services can cover the whole life cycle of projects, with the provision of effective engineering specialities management, and using the most advanced IT software (Primavera, PMWeb, BIM, etc.) to ensure project success.
Specialized Services:
ARE offers specialized services such as Risk Management, Fire & Safety Engineering, Environmental & HAZOP Studies, etc. for oil & gas, petrochemical, water desalination & power plants and other industrial & infrastructure facilities.
